

物件導向程式設計實習

第三周作業-實習3

1. 請同學執行以下程式

```
int math1 = 2*3%5+2/3;
```

```
int math2 = 2*3%(5+2)/3;
```

```
int math3 = 2 << 1+3 >> 3;
```

```
boolean bool = false | false == false & true;
```

```
System.out.println("math1 = " + math1);
```

```
System.out.println("math2 = " + math2);
```

```
System.out.println("math3 = " + math3);
```

```
System.out.println("bool = " + bool);
```

請解釋上述程式的運算順序，並將答案寫在文字檔(txt)中上傳。
